

Stay safe, friends. Learn to code from home. Use our free 2,000 hour curriculum.

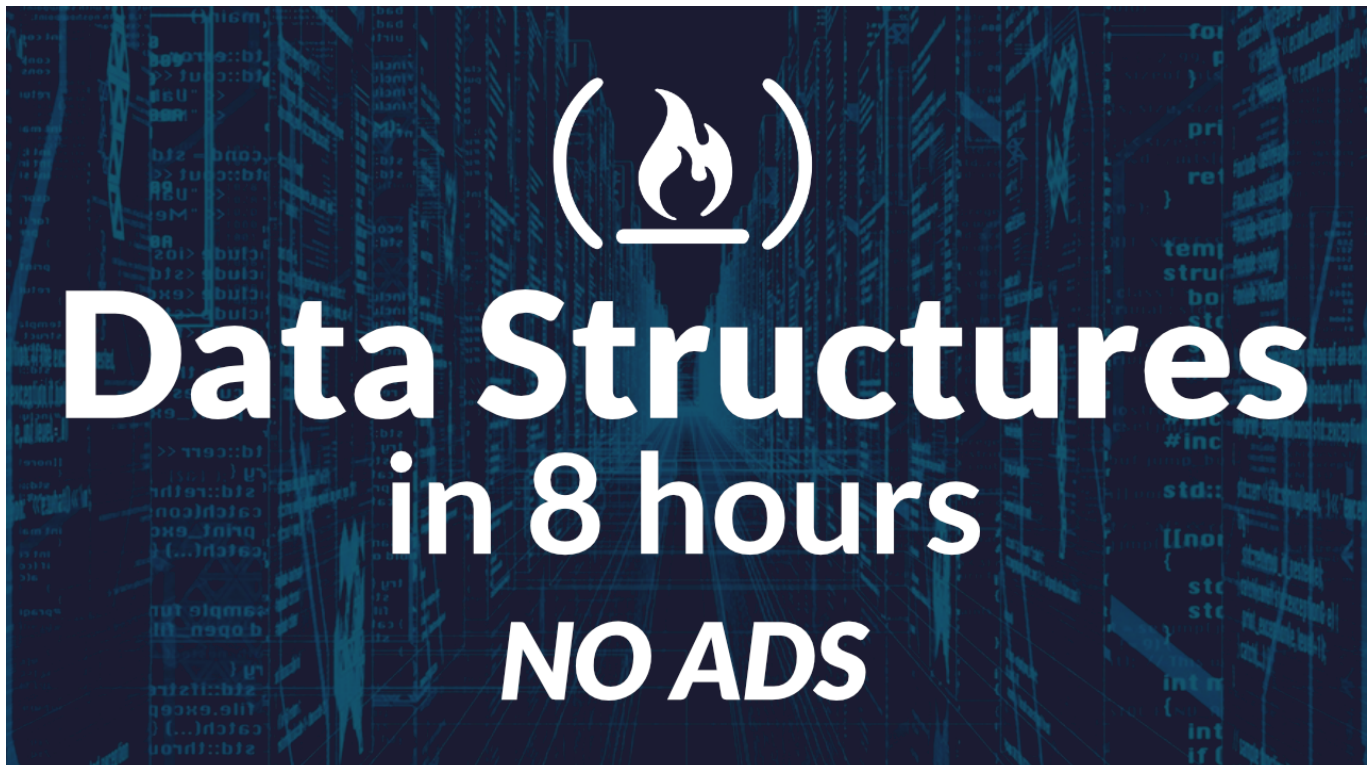

23 SEPTEMBER 2019 / [#DATA STRUCTURES](#)

Learn Data Structures from a Google Engineer - A Free 8-hour Course

Beau Carnes

I'm a teacher and developer with freeCodeCamp.org. I run the freeCodeCamp.org YouTube channel.

Learn and master the most common data structures in this free 8-hour video course from Google engineer William Fiset.

This course teaches data structures using animations to represent the data structures visually. And it's designed with beginners in mind.

You'll learn how to code various data structures and combine them through Finet's step-by-step instructions.

Each data structure comes with working source code to help solidify your understanding. The code snippets are in Java, but if you know JavaScript or Python you will probably be able to understand these just fine on a conceptual level.

You will learn about these data structures:

- Static and dynamic arrays
- Singly and doubly linked lists
- Stacks
- Queues
- Heaps/Priority Queues
- Binary Trees/Binary Search Trees
- Union find/Disjoint Set
- Hash tables
- Fenwick trees
- AVL trees

You can watch the [full video on the freeCodeCamp.org YouTube channel](https://www.youtube.com/watch?v=Hh3D7R1Uo64) (8 hour watch). As always, it's free, and there are no ads to interrupt you.

If you read this far, tweet to the author to show them you care.

freeCodeCamp is a donor-supported tax-exempt 501(c)(3) nonprofit organization (United States Federal Tax Identification Number: 82-0779546)

Our mission: to help people learn to code for free. We accomplish this by creating thousands of videos, articles, and interactive coding lessons - all freely available to the public. We also have thousands of freeCodeCamp study groups around the world.

Donations to freeCodeCamp go toward our education initiatives, and help pay for servers, services, and staff.
